SECTION 4:

TERMS OF REFERENCE FOR OPERATION & MANAGEMENT OF URBAN HEALTH & WELLNESS CENTRE

4.1. Introduction/Background

- The National Urban Health Mission (NUHM) was set up in 2013, as a sub mission of the National Health Mission, to improve the health status of the urban population in general, but particularly of the poor and other disadvantaged sections through facilitating equitable access to available health facilities by rationalizing and strengthening the existing capacity of health delivery.
- Under Ayushman Bharat, Urban Primary Health Centres (UPHCs) are being strengthened as Urban Health and Wellness Centres- Health Wellness Centre (UPHC-HWC) to deliver Comprehensive Primary Health Care (CPHC). Currently, this is done through enabling Urban PHCs, covering a population of 50,000. Outreach functions in this population, are undertaken by five ANMs and 20-25 ASHAs, with a normative coverage of a population of 10,000 served by a team of one ANM and five ASHA.
- Healthcare needs and aspirations of urban residents are different from those in rural areas. The current strategy of relying on outreach teams of ANM and ASHA alone to provide selective services is not sufficient. State experiences demonstrate that provision of health care services by trained service providers from facilities closer to poorer, and vulnerable urban communities is likely to improve access to an expanded range of services, reduce OoPE, improve disease surveillance, and strengthen referral linkages. At the same time, state experiences also show that the establishment of “Poly Clinics” in selected Urban Primary Health Centres, enables reach of specialist services to poor communities, thus building trust in the public health system.

4.2. Urban Health & Wellness Centres (UHWCs)

Urban HWCs (UHWCs) are envisaged to decentralize comprehensive primary health care services below the existing UPHC level in NUHM targeted cities, act as a standalone facility in smaller towns & peri-urban areas. This is the first point of call for accessing primary health care services in urban and peri-urban areas.

The proposed UHWC is completely a new public health structure in urban areas which will cover smaller population cohorts (15,000-20,000 urban population) residing in the slums, similar habitations & peri-urban areas.

The Urban-HWC would also enable strengthening the continuum of care for upward and downward linkages, improve access to high quality care, minimize the out of pocket expenditure incurred on health care services, and decongestion of secondary and tertiary health care facilities.

- #### **4.3. Location of the UHWC :**
- The location of the UHWC shall be finalized by ULB((Municipal Corporation/ Municipality/ NAC) and regarding functional of UHWC, the following options can be undertaken ;

Option- 1 (Building on rent)

- Hiring cost of the building in the identified location
- Provision of fund for Security charges for House Rent, White washing, branding, signages, hoarding, interior suits to medical set up including power back up etc.

Option- 2 (Govt./ ULB/Community Building)

- Provision fund for Minor repair/maintenance of exiting building, White washing, branding, signages, hoarding, interior suits to medical set up including power back up etc

The facility should be located away from the garbage collection site, water logging area, cattle shed and it should be connected with all whether road, water supply & electricity facilities. The UHWC should not be located in areas which are within 3 kms distance of an UPHC- HWC, Urban CHC, SDH, DHH or any other Govt. health facility. The operational area/boundary of the UHWC to be notified by the concerned CDM & PHO in case of Municipality/NAC/peri urban area and ADUPHO in case of Municipal Corporation area.

4.4. Service Areas under UHWCs

Urban HWCs would have 9 Service areas which primarily includes outpatient care for a range of Primary Health Care Services as per CPHC guidelines, ancillary health care services like Diagnostic, Physiotherapy, Nutrition Counseling, Outreach services, Public health functions related to surveillance and early outbreak management as well wellness activities at community level.
