Brief description of the project.

The Hadua Medium Irrigation Project is one of the medium irrigation project contemplated for integrated development of Narasinghpur, Badamba and Tigiria block of Cuttack district. The project envisages construction of a dam and a reservoir across the river Hadua, a tributary of river Mahanadi which is located near the village Kharod in Cuttack district and is about 94 k.m from Cuttack in Odisha state. The Project envisages construction of a 387m long and 43.825m height concrete dam besides a central Ogee crested spillway proposed in the dam across the river.

This medium irrigation project will provide irrigation facility to 3641 Ha of CCA out of 6205 Ha GCA with annual irrigation of 6598 Ha in the draught prone areas under Narasinghpur, Badamba and Tigiria Block of Cuttack District. The ayacut is located on the right side of Narasinghpur Branch Canal of Rengali Right Irrigation System.

Location and accessibility:

The Project is located in Badamba block of Cuttack district near village Kharod at Latitude 20° 27' 50" N and Longitude 85° 15' 30" E vide Toposheet No. 73 H/2, H/2 H/6 & H/7. The dam site situated at a distance of 100kms from Cuttack, the district headquarters. The nearest railway station of East Coast Railways is Athagarh which is 55kms away. The dam site is 130kms from the state capital and nearest airport, Bhubaneswar.

Necessity of Project:

The Project area comes under Narasinghpur and Badamba block of Cuttack district, which is a draught prone area. The agricultural practice in this area completely depends upon the rainfall which is not dependable because of wide temporal & spatial distribution. As a result, the agricultural production is much below the average level. Agriculture being the main source of income, the per capita income of the people in this area is low, so the inhabitants of the locality continue with poor education, mal-nutrition and poverty. The construction of a dam across Hadua river, providing irrigation is absolutely necessary to improve the agricultural output and economy of the region to mitigate the misery of the population, mostly belonging to the scheduled caste and scheduled tribes and backward class. Creating the provision of irrigation in this drought prone area is absolutely necessary for the above-mentioned purposes.

Villages coming under Hadua Reservoir

As a part of Hadua Irrigation Project, Hadua Reservoir Constitutes 04 villages with an area of Ac.168.29 of private land of Cuttack District in the state of Odisha. Out of which 01 village is fully, 01 village is partly and rest 02 villages are affected cultivable land only.
